CURRICULUM

**BMC Discovery 22.x: Fundamentals Application**

## Modelling - Part 1 (SPT)

Duration 42 hours, 45 minutes

### Details

BMC Discovery is a datacenter discovery solution that automatically discovers datacenter inventory, configuration and relationship data, and maps applications to the IT infrastructure. BMC Discovery establishes the foundation for improving IT processes and productivity by providing timely and actionable insight to make informed decisions in IT service management, asset management, and infrastructure/operations management.

This course provides information on the mapping business application in various ways. Participants will receive all important information on the Definitions Block, Data Sources, and Static Application Mapping. The participants will also learn about adapting pattern template used in CMDB synchronization, and best practices to use TPL.

**Important Note:** Self-Paced Training (SPT) courses are comprised of a course instructor video that includes a demonstration of recorded lab exercises. This course offers closed captioning in five additional languages: French, Spanish, Deutsch, Portuguese and Italian. The multi-lingual closed captioning is generated using artificial intelligence (AI) and machine translation so that more customers can benefit from our courses. To request eBooks and labs for the SPT course, follow the instructions contained in the Introduction Module contained in the SPT course. Please note that each Enterprise Education Subscription Customer has access to a limited number of eBooks and labs for Self-Paced Training. Refer to BMC Education Services' [Policies, Terms and Conditions](#). Access to the course recording expires on the expiration date of the subscription.
